The holiday complex is operated year-round. During the winter season 2023-2025, 2 of the 4 restaurants were operational, as well as the bowling alley, the spa center, the fitness center and the squash courts. ### **3. Key risks and uncertainties facing Intercapital Property Development REIT during the remainder of the financial year**

The main risks and uncertainties that Intercapital Property Development REIT may encounter in 2025 are:

- Market risk – risk of a decrease in the market prices of the real estate that the company sells as a result of reduced demand for vacation properties, as well as the risk of low tourist flow for 2025 as a result of the slow recovery after the recent global financial crisis.
- risk of inability to service bank loans taken and the issued bond issue - in the event that the company fails to generate sufficient revenue to cover interest expenses and principal repayment.

An event with an extremely negative impact is the military conflict between Russia and Ukraine. The Company has no direct exposures to financial instruments issued by issuers in Russia and Ukraine and no relationships with Russian banks.

The indirect effects for the Company are expected to be reflected in increased uncertainty and a significant deterioration in the investment environment in 2025. The Company recognizes that the solvency of its customers may deteriorate as a result of inflation, increased energy prices and job losses. Due to the unpredictability of the military conflict, it is practically impossible to make a definitive forecast of the impact on the Company's financial position at this stage.
